

Royce's story

"My son is 4 years old, he was born with cerebral palsy, and we were told that he may never walk, there was no guarantee, and there was no expectation for him to progress. He is a smart kid with a huge amount of determination, but we never really knew (or even know now) what to expect. We found out about the BOOST Conductive Education late in the process last year, so we were put on a waitlist, and luckily we were given the opportunity to attend the program. My son went into BOOST Conductive Education mainly scooting around on his bottom. By the end of the program, he was potty-trained during the day, he was crawling on all fours and within two weeks of the program ending he was walking, without any assistance. His progress has stunned his therapists, his doctors, his teachers and all of us."

Jessica Avner, proud mom of Royce, from Rohnert Park, California
